Size: 3" W x 1.5" T x 2" D

Appearance: Chrome Plated

Hardware: (4) 10-24 x 3/8 Phillips Head
(1) CT-30106-REP Blocker Plate

Product Description

The CT-30106 Invisible Magnetic Hookswitch is available on all models of phones manufactured by TMG, and as a kit to upgrade existing product in the field. The Invisible Magnetic Hookswitch eliminates hookswitch dialing fraud and hookswitch maintenance. The hookswitch mounts with a steel plate sealing the opening where the Tongue/Hookswitch assembly would normally be mounted. It works by using the magnet of the telephone handset receiver to activate a reed switch sealed in the cradle. When the handset is lifted from the cradle, the telephone goes off-hook. When the handset is replaced in the cradle, the telephone goes back on-hook. No special handset is needed. The hookswitch hole is sealed to help prevent moisture from entering the interior of the phone, and there is no moving tongue mechanism to stick or break.
